IMPORTANT

Do these **TWO** things at once.

FIRST—Read your Book of Directions CAREFULLY before you attempt to use your new Velvet Shaver. Your shaver is a precision instrument and the more carefully you read and follow the directions the more pronounced will be your success in its operation. Be patient. It takes a little time to learn.

SECOND—Register your shaver at once with the factory to render immediately effective your guarantee and as an added protection in case of theft.

Your shaver is made of the finest materials by expert workmen and thoroughly tested before leaving the factory.

Should you have occasion at any future time to write the factory, BE SURE that your letter carries your Registry Number.

Attention to the above requirements will aid us in providing you with a maximum of shaving satisfaction.
